COOL
DISPLAY SOLUTIONS INC.

Effective In-Store Cooling Solutions

Cool Display Solutions has been mastering the art of open-face refrigerated displays for over a decade.

At CDS, we are committed to the continuous development and enhancement of our chilled display offerings. Today, we provide a complete line of promotional refrigerated displays that empower our clients to launch and promote their products beyond the limitations of fixed, impersonal and generic coolers simply taking up space in highly competitive retail environments.

Our lineup includes both permanent and semi-permanent displays. The semi-permanent displays are highly durable and manufactured using environmentally friendly recycled corrugate, along with UV biodegradable inks.

Our permanent AVO line is constructed from metal and glass and features an easy-to-use, interchangeable graphics system made with sustainable materials.

The latest addition to this lineup, the AVO 48 Q-Line, combines a chilled, visually inviting product display with integrated ambient storage—perfect for capturing grab-and-go impulse purchases.

Every display in our lineup is designed with a single objective: to deliver impactful in-store brand communication. By capturing shopper attention with strong messaging and visual appeal, our solutions help drive meaningful increases in sales.

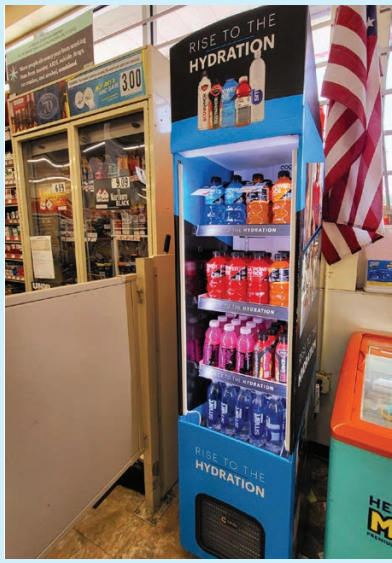
Capitalize on Shopper Engagement That Drives Sales

We believe shopping shouldn't be boring. Chilled products stuck in traditional coolers—and the shoppers browsing them—deserve better.

At Cool Display Solutions, we help brands break out of the aisle with engaging retail experiences. From global and regional brands to the growing importance of private label, we create bold promotional displays that boost visibility and create memorable shopping moments.

Our GRAB N' GO displays are designed to capture attention, drive engagement, and increase sales lift.

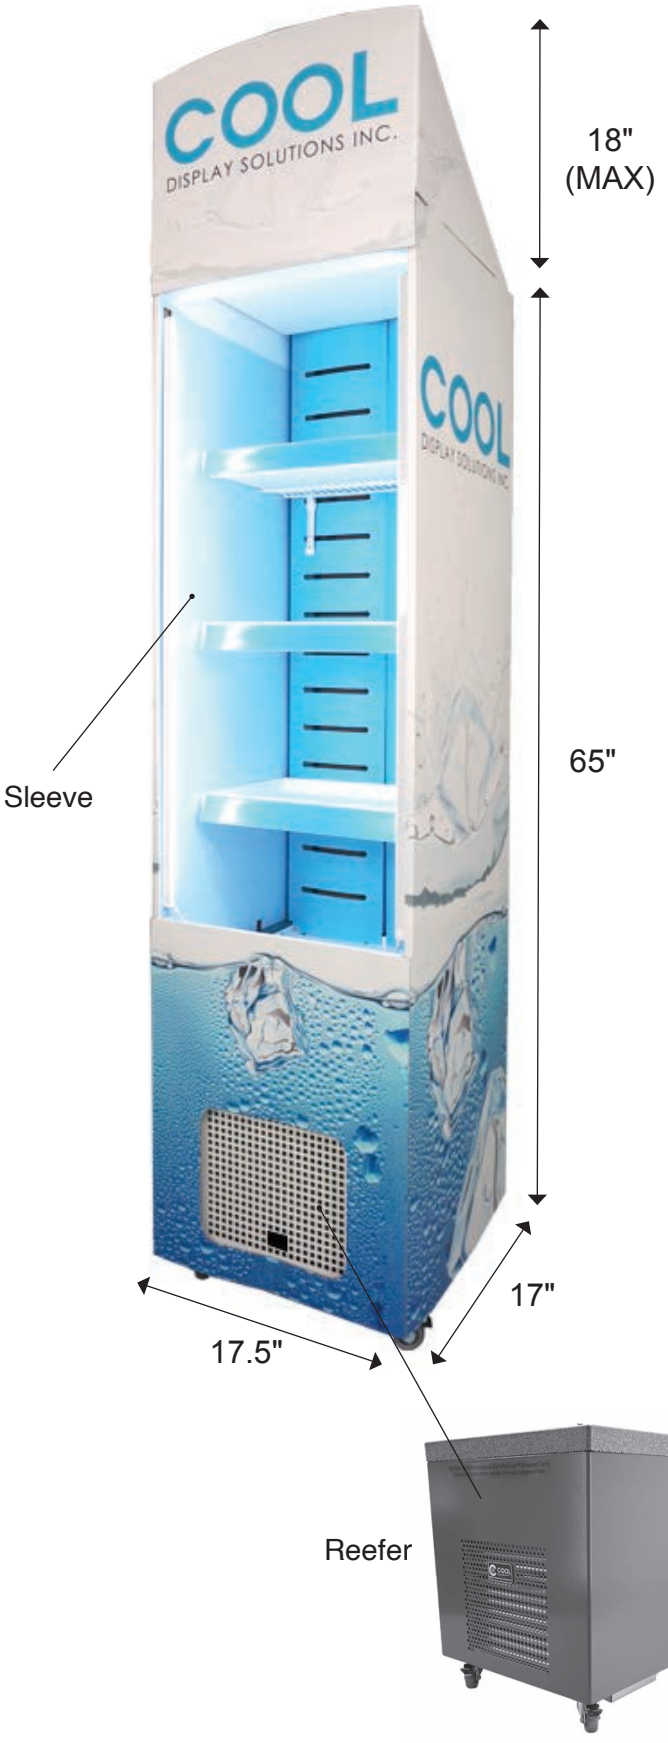
Partner with our expert team for end-to-end support—from design to full implementation—and deliver measurable impact where it matters most: at the point of purchase.



CLASSIC 65

Sustainable *Energy Efficient* *Recyclable*

COOL DISPLAY SOLUTIONS INC.



CLASSIC 65 SLEEVE

TECHNICAL OVERVIEW

Height:	80" / 203.5cm
Width:	17.5" / 44.5cm
Depth:	17" / 44cm
Weight:	16.5lbs / 7.5Kg (approx.)
Material:	Cardboard (sustainable)
Shelves:	3 adjustable 1 fixed 16" x 11" x 1.5" / 41cm x 28cm x 3.5cm each shelf holds 50lbs / 22.5Kg
Content:	4.0 cubic ft./113L
Life Cycle:	12 weeks

SHIPS IN
1 COMPLETE
PACKAGE

REEFER UNIT

TECHNICAL OVERVIEW

Overall Dims:	20.4" x 17.7" x 17.3" 52 x 45 x 44 cm
Weight:	55lbs / 25Kg (approx.)
Technical Data:	2.3 A • 115 V • 60Hz.
Energy Usage:	8.5 kwh / day
Refrigerant	Climate-friendly R290
Temp:	1°C - 6°C / 33.8°F - 41°F
Top:	Sheet Metal with LED-outlet
Wheels:	4 (2 with brakes)
Base:	Metal Casing Midnight Grey
Ambient:	Max 22°C / 60% Hum.

ADDITIONAL FEATURES:

- *Preset Digital Electronic Temperature Control*
- *Automatic Water Evaporation*
- *Plug & Play Cooler*

COOL
DISPLAY SOLUTIONS INC.

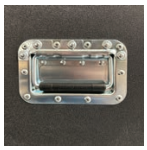
Erasable Chalkboard Inner Doors

2x Butterfly Lock



2x Lifting Handle

2 Turning Wheels with Brake, 2 Fixed Wheels

ROADIE
OVERVIEW

The Roadie is the right solution when the same refrigeration unit is moved several times from one event to another.

A very robust flight case protects the refrigeration unit against outer damage.

Small dents in flight case only add to the credibility! High-quality, lockable castors and side handles enables easy moving of the unit.

ROADIE

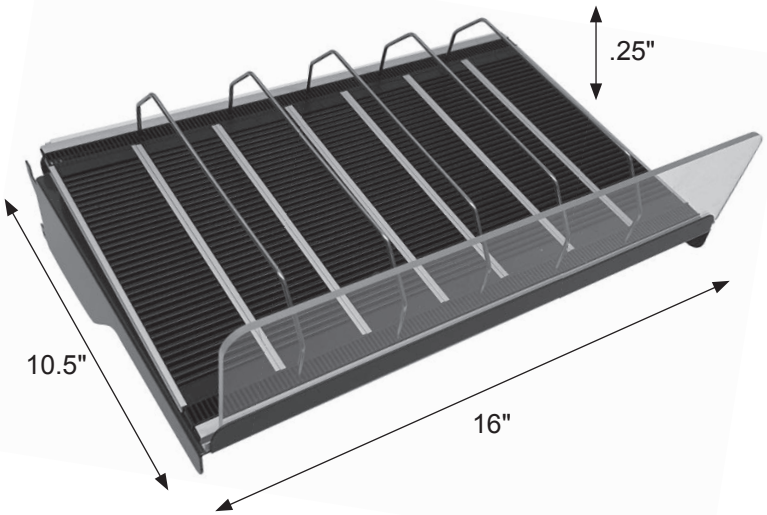
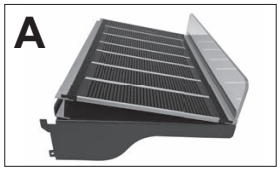
GRAVITY FEED ROLLER TRACK SYSTEM

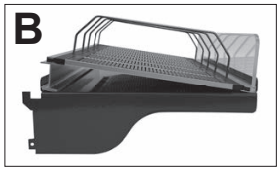
Sustainable *Recyclable*

COOL DISPLAY SOLUTIONS INC.





A: Can Configuration*
*- Does **not** require dividers.*
**Shown on an Avanto Shelf.*



B: Bottle Configuration*
- Does require metal dividers.
**Shown on an Avanto Shelf.*

GRAVITY FEED ROLLER TRACK SYSTEM

TECHNICAL OVERVIEW

Height:	.25" / 1.27cm (without plexiglass)
Width:	16" / 40.6cm
Depth:	10.5" / 26.7cm
Weight:	1/2 lb / .22Kg (approx.)
Material:	Aluminum / plexiglass / metal
Life Cycle:	Permanent

ADVANTAGES

- Easy installation as the roller tracks sit on top of existing shelves
- Gravity-feed design uses integrated rollers to self-face products
- Products remain visible and easily accessible
- Easy to stock and reset to minimize labor costs
- Ideal for beverages and dairy products
